

TENANT BUILD-OUTS
& RENOVATIONS

Turning Empty Space Into Usable Space.

Gibson
An EMCOR Company

Gibson Electric is an electrical construction firm specializing in commercial electrical and telecommunication infrastructure design, structured cabling installation and maintenance, electrical power distribution systems, data transmission systems, and distributed antenna systems (DAS). Gibson Electric also provides tenant buildouts and office building renovation services to various clients in the Greater Chicagoland area.

The Gibson Electric team works quickly and diligently to help clients maintain ongoing operations whenever possible while tenant improvements are underway. Throughout each project, field supervisors utilize mobile device technology to allow for quick communication of project status, delivery tracking, and punch list completion.

Whether clients have empty space that needs to be built out or useable space that needs to be reconfigured, Gibson Electric can perform electrical tenant build-outs and design-build/design-assist tenant improvement services and installations.

Expedited Permits. Strong Vendor Relationships. In-house Prefabrication.

From the start of a project, Gibson Electric strives to efficiently manage all aspects of the schedule to help keep the project on track. One way Gibson Electric does this is by assisting the tenant's general contractors and construction managers to help expedite the permit process.

Gibson Electric's strong vendor relationships also allow for more efficient and accurate procurement. Any equipment that requires long lead times is pre-purchased and quick issuance of submittals and assistance approving material orders help support fast-paced schedules.

HUNDREDS OF PROJECTS. NINE MARKETS SERVED.

Transportation

Our in-house prefabrication shop also allows for greater control over safety, and helps to reduce the labor hours needed on site by only requiring installers be present at the time of installation. Prefabricating components can help reduce the need for field supervisors and managers.

Extensively Trained. Expertly Deployed.

At Gibson Electric, project managers and field staff are trained extensively on many of today's complicated lighting and controls products. The skills and expertise the team provides include:

- > Understanding the ever-changing lighting control systems and associated conduit/raceway.
- > Coordinating all low-voltage systems: structured cabling, life safety systems, security, paging, distributed antenna systems (DAS), sound masking, and others.
- > Coordinating raceway and conduit systems, including ladder racks and basket trays, with all associated support systems.

- > Integrating energy efficient lighting control systems that work collaboratively with existing building automation system to help reduce energy costs.
- > Understanding and interpreting specific building requirements while working with building engineers.
- > Working closely with the building engineers and property managers when accessing other tenant floors for coring.

Harnessing the Power of a Fortune 500® Leader.

A Fortune 500® company, EMCOR Group, Inc. (NYSE: EME) is a leader in mechanical and electrical construction, industrial and energy infrastructure, and building services.

EMCOR specializes in planning, installing, operating, maintaining, and protecting the sophisticated and dynamic systems that create facility environments. This includes systems such as electrical, mechanical, lighting, air conditioning, heating, security, fire protection, and power generation.

With over 180 locations and approximately 38,000 skilled employees, EMCOR works in virtually every sector of the economy for a diverse range of businesses, organizations, and government agencies.

Safety that Beats the National Average

EMCOR's safety performance consistently remains strong year after year with a current Incident Rate that is 52-percent lower than our competitors (Source: Bureau of Labor Statistics Industry Average for Specialty Contractors NAICS 2382, 2022). For 15 consecutive years, our incident rate has been less than half the industry average.
